
Group Project Deliverable 1

Project Proposal

Overview

This is the first deliverable for the group project in which you will be preparing your project idea. Read this document along with the document about project specification (see the other PDF file).

Requirements

This deliverable is to be conducted in a presentation. Prepare your presentation in presentation slides. The content of the presentation should include two items:

- a. The game idea:
 - Name existing games that you get inspired to develop this project.
 - Your game title
 - Synopsis and the general idea about the game
 - The game mission, what the player needs to achieve in the game

- b. Game Storyboards.

Storyboarding is a technique to showcase the user experience in using a product in a form of comic book illustration. Here, you need to present your storyboards that convey the playing of the game. Include at least three scenes, such as the player earns points, the player loses points or lives, etc.

How to prepare the storyboards

Use any illustration or drawing tools such as PowerPoint or word (using the drawing tools), [whimsical](#) – a UI/UX tool, etc., to prepare the drawings. Alternatively, you may also hand-sketch them.
